

# ***Psychological Disorders Project***

## PURPOSE

To use your knowledge, as well as research new & supporting information, of psychological disorder to create a realistically useful informational Prezi or PowerPoint. The final product will offer significant information to your peers about the aspects of a specific illness.

## DIRECTIONS

- Students will work in pairs.
- Students will choose a somewhat common psychological disorder. This will be the illness they will be researching.
- Examples include but not limited to:

- |                         |                                  |                         |
|-------------------------|----------------------------------|-------------------------|
| o Addiction             | o Schizophrenia                  | o Dissociative Disorder |
| o Personality Disorders | o Post-Traumatic Stress Disorder | o Dysthymia             |
| o Anxiety Disorders     | o Panic Disorder                 | o Phobias               |
| o Eating Disorders      | o Major Depression               | o Autism                |
| o Dementia              | o O-C-D                          | o Teenage Depression    |
| o Bipolar Disorder      |                                  | o Tourette's            |

- Students will research the mental disorder by answering the Psychological disorder Research Questions (to be turned in).
- Students will then make an informational Prezi or PowerPoint about the psychological disorder they researched.
- Students will present the information to class.
- As classmates are presenting, peers will fill out the "Psychological Disorders Presentations Notes" sheet.
